1. Setup paper product with preset amounts - sets of 100
2. Paper should have same related items whether regular or extra (this way it will add up all paper for Roy to count)
3. Remove option for 2 images on product page
4. Update new product with how many prints for single photo layout -100
5. Shipping Checklist: Make option for adding overlay (vs logo)
6. Update product page to select logo on top, bottom, or overlay on top of images
7. ---for related items, it will say Logo Top, Logo Bottom, or Overlay. For overlay, need to format image in the correct size depending on photo layout ordered (strip or single)
8. Update product page with image examples

NEXT STEPS:

1. have someone test prep a PB using the new checklists (office)
